An attempt has been made to loosely show color code correlations. DoD and FPCON Levels do not have color codes assigned.

Dept. Homeland Security THREAT LEVELS

DHS Levels	STATUS
SEVERE	
HIGH	
ELEVATED	X
GUARDED	
LOW	

The different threat levels in homeland security are determined by the likelihood of a terrorist attack on the US and its territories. The five levels are:

Red - severe (severe risk of terrorist attacks)

Orange -- high (high risk of terrorist attacks)

Yellow -- elevated (significant risk of terrorist attacks)

Blue -- guarded (general risk of terrorist attacks)

Green -- low (low risk of terrorist attacks)

DoD THREAT LEVELS

DoD Levels	STATUS
HIGH	
SIGNIFICANT	X
MODERATE	
LOW	

Developed by intelligence staff officers.
Can be used to determine appropriate FPCON. The four levels are

High– Anti-US terrorists active

Significant– Anti-US terrorists present

Moderate– Terrorists present, No indication of Anti-US activities

Low– No group detected or group is non-threatening

Local Force Protection

FPCONS	STATUS
DELTA	
CHARLIE	
BRAVO	X
ALPHA	
NORMAL	

Force Protection Condition Levels are progressive security measures for implementing local AT/FP measures
due to threats against US Army interests. The FPCONS are:

Delta (Terrorist attack has occurred or likely)

Charlie (When incident occurs or may happen)

Bravo (Increased or predictable threat exists)

Alpha (General threat exists, unpredictable nature of attack)

Normal (No Discernable Terrorist Activity)
